Pre-conditions: Use non-existing E-mail and non valid E-mail.

Test Case Data: Use “{@a” for E-mail

Steps to reproduce:

- 1.Navigate to top right corner and click on the human icon.

2.Navigate to Registration tab.

3.Enter "{@a" for E-Mail.

4.Click on Registration.

Expected results: An error message appear that restrict a special signs and want from user to enter valid E-mail.

Actual results: Theres no error message and user is able to register with FAKE E-mail.

The screenshot shows the Sare Care website's registration modal. The form fields are: Username (filled with 'test'), Email (filled with '{@a' and highlighted with a red border), Password (filled with 'password'), and Repeat password (filled with 'password'). A red box highlights the email field. Below the password fields, there is a checkbox for receiving promotional emails, which is unchecked. A red error message icon and text 'Please fill out this field.' are visible next to the Repeat password field. The Registration button is highlighted in purple. The background shows the website's header with the Sare Care logo and navigation menu, and a promotional banner for 'BOX NOW' with a '50€' discount.
